There's always somebody who can't grasp a new Idea. Fortunately, there are a lot of other people . . . those who get Ideas, and those who listen to them and *do* something . . . so that there's progress in our old world.

Like a lot of American businesses, we've built our whole company on new ideas. Like the total-electric home, and the all-electric school, and reducing the cost of our product while everyone else was raising theirs.

A lot of our Ideas came to us from young people who joined our company, and from others outside, in other Industries. But the important thing is what we did with those Ideas. And what we hope to do with more that come to us in the future.

Business needs Ideas. Got any?
